

Sometime in 2017

Hello Bruce,

Unfortunately, we have a populace suffering from chronic political correctness, and they still don't understand the Muslim menace. All you have to do is watch "Waters World" on FOX or "Lie Witness News" on Jimmy Kimmel to understand the lack of knowledge of the average citizen. The following quote has been widely circulated on the internet:

"The danger to America is not Barack Obama, but a citizenry capable of entrusting a man like him with the Presidency."

It was credited to a Czech newspaper. "According to snopes.com, it didn't originate there, but it sums up the U.S. situation. I have been stewing about Islam for almost thirty years, since Michael Youssef invited me to lunch at Ray's on the River. I just knew him slightly then, and he wanted to tell me of his plans to start a new church - Church of the Apostles. I wrote a blog about the startup and I quote from the blog below:

"We had ordered lunch and were making small talk when I mentioned something regarding the "communist menace". Michael quickly told me that militant Islam had supplanted communism as the major threat to the free world. He had written the book "Black Gold and Holy War" three years before under the pseudonym Ishak Ibrahim. Michael revised and updated the book after the 1991 Gulf War, and again after September 11, both of these under his own name. I had never heard of the Muslim Brotherhood, or the Wahabi sect. In fact, Jihad was a word I was not familiar with. Michael had outlined Islam's plans to conquer the West in his book. After reading it, I understood why he had published anonymously. He had audiences with senators and cabinet-level officials of the Reagan administration. They didn't disbelieve what he was saying. They just knew it could not be "sold" politically. It has now been 27 years since the first publication, and his predictions (I think they were prophecies) are being fulfilled. There is no doubt about their plans, and it's still hard to "sell" in our politically correct society."

I wrote this 5 years ago, so it has been 32 years since the publication. Ed Noble - the developer of Lenox Square - headed the Synthetic Fuels Corporation in the Reagan Administration, and he gave the book to every member of the House and Senate. Michael's Emory PhD is in social anthropology, and I didn't know it then, but it was prophetic. It all has come to pass.

I haven't had much to do for the last few years, except recuperating, so I became a serial blogger. One of my earlier blogs is

PRIMER ON SUNNIS AND SHIITES
